Name

IGCSE Geography – What factors influence the population density of Iceland?

Task 1 – Using the embedded maps on geographypods, annotate the key features on to the population density map of Iceland above. These should include:

* Plate boundaries & major volcanoes
* Key industrial activity
* Location of major glaciers
* Coolest and warmest areas
* Lowland areas
* Main roads

Don't forget to add a key.

Key

Task 2 - Using the map evidence board above, complete a piece of analysis that identifies and then analyses the factors influencing population density in Iceland. Use the key factors list below to get you started:

Factor	Image	How it influences population density in Iceland.
