

Your name here :

Task 1 – Describe the spatial distribution of the most successful sporting nations on earth. Use the tick box key on Arc GIS to also discuss male / female successes.

Task 2 – Where possible, for our IB five, describe the level of success and suggest a sport(s) that has led to this.

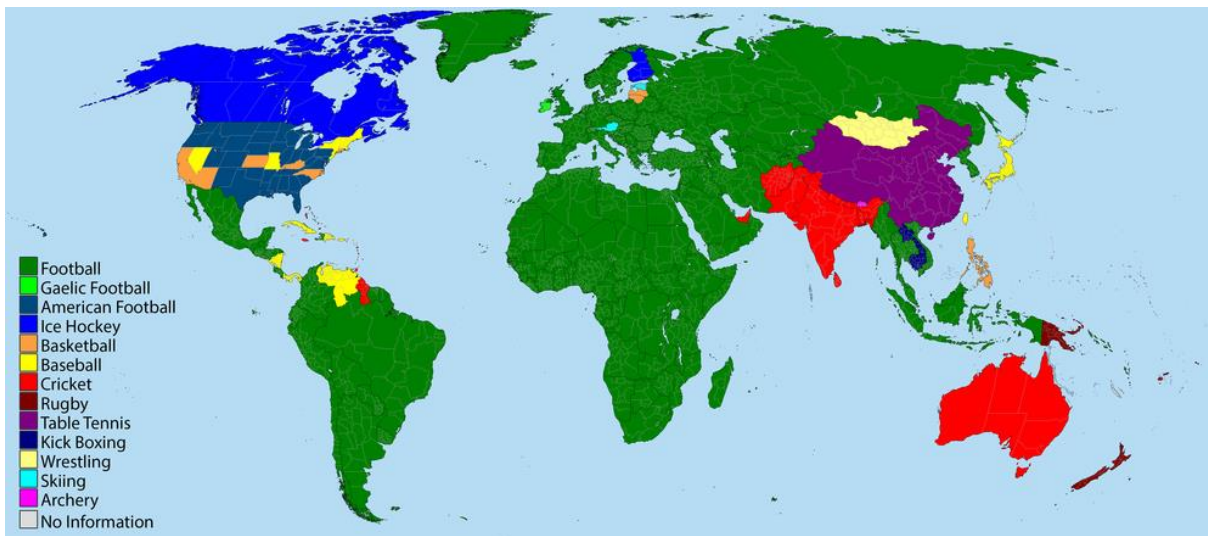

USA	
Australia	
Brazil	
China	
Niger	

Task 3 – Can you see any patterns that exist in the Top 10 most successful countries in the world?

Your name here :

Task 4 – Use the hyperlink on Geographypods to now re-order the table in terms of successes per capita (per person). How does this change things?

Task 5 – Using the menu on the left hand side of the Greatest Sporting website, choose a sport you are particularly interested in (rugby, football, equestrian, athletics etc) and write about the relative successes in terms of top countries and ‘per capita’ successes. Can you identify any reasons for these patterns?

Task 6 – Explain the distribution of popular sports worldwide and to what extent these patterns represent historical political events.
