

IGCSE Geography – Drainage Basin Characteristics

Task 1 – The diagram above shows the land based processes of the hydrological cycle (your previous lesson). It is important that you recognise the following key features of a drainage basin. Conduct some research to find out what each means and then label the appropriate place on the diagram above.

Feature	Description
1. The Watershed	
2. Confluence	
3. Tributary	
4. Source of river	
5. Mouth of river
